

Compactus[®] Side2side

Space where you would least expect it

compactus[®] keep it smart

Uses space where you least expect it

Compactus® Side2side utilises space where you least expect it, namely directly in front of a row of office cabinets. Valuable extra storage space is created by placing a row of mobile cabinets on rails. Both the front and back cabinets have a flexible set-up. Documents that are consulted less

frequently (from previous years, for example) can be stored in the back cabinets, whereas the front cabinets can be used for holding those documents and items used on a daily basis.

The open cabinets and sliding door cabinets can be combined as you choose.

A wide range of accessories are available for the Compactus® Side2side system, such as frames for suspension files, bookends, reference shelves, trays and drawers, all of which are tailored to the most commonly used filing and organisational methods.

Compactus® Side2side has a variety of application possibilities for offices, shops and warehouses. It can be used against a wall, for example, or as a partition wall.

Compactus® Side2side is available in the colour combination anthracite RAL 9016 and aluminium RAL 9006. See our colour chart for other colour options.

Compactus® Side2side is available in a wide range of dimensions.

Dimensions				
Stationary depth	Mobile depth (incl. ramp)	Width per section	Height
